

Quill Falcon Cyclone with HoldTight® 102

The entire Quill Falcon Cyclone precision dustless blasting range is now available with the Quill Auto Dose System, which allows operatives to dose additives such as HoldTight® 102 Rust Inhibitor through the blast pot during the blast process thereby preventing the flash rusting of steel surfaces for up to 72 hours

+

=

Removes soluble salts and chlorides leaving surfaces cleaned, profiled and flash rust free for new coatings to be applied

Prevents flash rusting for up to 72 hours

Blasted steel surface 48 hours later, without Holdtight®102

Blasted steel surface 48 hours later, with Holdtight®102
